

tizi Tankstation 4x Mega Toploader

Equip hotel rooms with integrated USB chargers

Keep your clients happy by offering a conveniently integrated, USB charging station. The most modern, smart, installation solution on the market for hotel rooms, lounges, desks, waiting rooms, and conference rooms.

“Hotel guests forget their chargers as often as they forget a toothbrush”

The Hotel Mondrian Suites, located in Berlin where Checkpoint Charlie once stood, recently equipped all their rooms with built-in USB chargers so guests can charge up to four devices simultaneously on the nightstand. “With the tizi Tankstation 4x Mega in every room, and a variety of charging cables to lend at the reception, we’ve solved this problem for our guests. Of course, we also still offer toothbrushes.” explains hotel director, Catrin Sandow, “The multiple (x4) USB ports are greatly praised by our international guest who may only have one wall charger yet multiple devices that they need to charge”.

“One of four fundamental necessities in a hotel”

“Nobody enjoys crawling around under the bed searching for outlets to charge their USB devices”, admits Till Schadde, CEO of tizi manufacturer equinux, “charging your mobile devices, such as iPhones or iPads has become one of the four fundamental necessities in a hotel, after a good bed, clean bathroom, and an internet connection.”

Automatically charge all gadgets with optimal power

The average USB charger delivers a measly 0.5A, whereby the tizi Tankstation 4x Mega charges all devices with the highest possible power (up to 2.4A). It doesn't matter if it's an iPhone, Android, Tablet or Kindle. The intelligent *Auto Max Power technology* automatically recognizes which device is plugged in and delivers the right amount of power throughout the entire charging cycle.

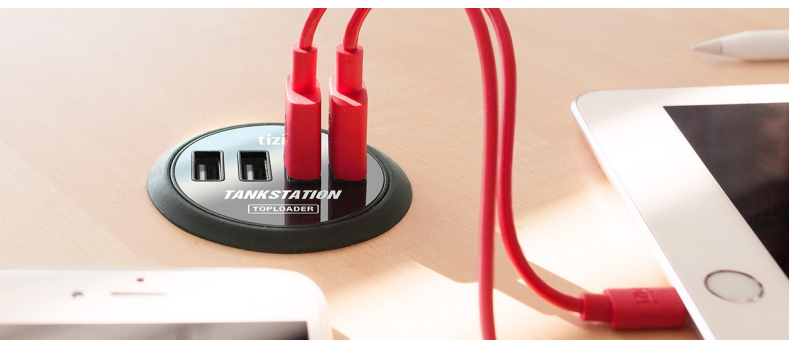

“Install in minutes, between check-in and checkout”

The tizi Tankstation comes with an installation kit. A standard drill, a hole saw adapter, and the included adapter rings, are all you need to install the Tankstation. Within only a few days, all 132 rooms of the Hotel Mondrian Suits were equipped with the USB ports. “Our custodian only needed a couple of minutes per room for installation, and he was even able to equip some rooms in the period between checkout and check in.”
